 **MADE IN BRITAIN**

Internationally recognised products that are perfect for a multitude of applications including eye-catching signage, innovative point of sale displays, temporary shelters and highly effective way finding solutions

- ◆ Clean easy-peel protective film
- ◆ UV resistant for outdoor use
- ◆ UV flatbed printable
- ◆ Rigid, lightweight panel
- ◆ Flat, smooth, uniform surface
- ◆ EN13501-1, REACH, RoHS certified

Premium quality composite panels made from aluminium composite materials featuring two aluminium sheets sandwiching a polyethylene core., available in one of the widest colour ranges on the market.

## ALUPANEL®

The panel for fabrication  
Easily fabricated and folded ◆ 5 year guarantee

Skin Thickness (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
.012" Aluminum	2, 3, 4, 6	1220 x 2440/3050, 1250 x 2500/3050, 1500 x 3050/4050, 2050 x 3050/4050

## ALUPANEL LITE®

Superb for flat applications  
Wide range of colors ◆ 2 year guarantee

Skin Thickness (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
.008" Aluminum	2, 3, 4,	1220 x 2440, 1250 x 2500, 1500 x 3050/4050, 2000 x 3050/4050

## ALUPANEL ECO

Perfect for short-term projects  
9016 White ◆ 1 year guarantee

Skin Thickness (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
.006" Aluminum	2, 3	1220 x 2440, 1500 x 3050

## MULTISHIELD

galvanised steel composite sheets

Dual-sided Steel Composite  
Magnetically receptive ◆ 5 year guarantee

Skin Thickness (mm)	Panel Thickness (mm)	Sheet Sizes (mm)
.010" Galvanised steel	3, 6	1220 x 2440/3050

Ideal for whiteboards, Multishield is a dual-sided steel composite material that can be fabricated and is receptive to magnetic media.

- ◆ Magnetically receptive surface
- ◆ Choice of digital coating or Dry erase finish
- ◆ Can be fabricated
- ◆ Strong and durable

Used in conjunction with flexible magnetic print material, a Multishield surface allows in-store visual merchandising graphics to be changed with ease. Such a system gives more flexibility to marketing programs as graphics can be effortlessly updated by rolling off the old and rolling on the new, transforming displays easily without the need for hanging frames or hard fixings. After removal, graphics can be conveniently stored or sent to other sites for re-use.

Both sides of the panel have a flat, smooth, uniform surface, one side with a digital coating to help produce vibrant, colour-fast prints and the other side with a dry erase coating - great for the likes of educational spaces, hospitals and offices. *\*5 year guarantee for interior use only*
