

MULTISHIELD

galvanised steel composite sheets

WRITE ON, WIPE OFF!

Multishield is a steel composite panel with a dry wipe whiteboard coating on one side. It's easy to fabricate and, in these challenging times, perfect for creating a home-schooling white wall

..... or maybe something a little more portable.

USE WITH MAGNETS

Thanks to its galvanised steel skins, Multishield is receptive to magnets; great for educational and creative uses as well as games.

Physical	3mm	6mm
Steel skin thickness (mm)	0.25	0.25
Weight (kg/m ²)	6.35	9.37
Face finish	Whiteboard / Digital Print coatings	
Core composition	LDPE
