

MULTISHIELD

galvanised steel composite sheets

WRITE ON, WIPE OFF!

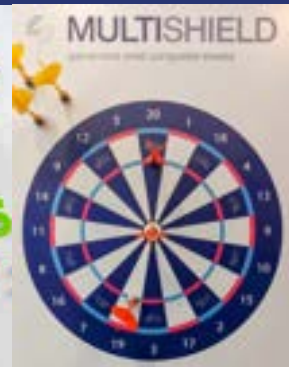

Multishield is a steel composite panel with a dry erase whiteboard coating on one side. It's easy to fabricate and perfect for creating custom whiteboards for the home, office or commercial environments...

... or maybe something a little more creative using the digital finish on the reverse ...

USE WITH MAGNETS!

Printed and laminated Multishield remains receptive to magnets - great for visual and creative applications.
