A double-sided composite panel offering greater strength and rigidity, Multishield’s galvanised steel sheets have two different coatings and are also receptive to magnetic media. Now available in either digital/digital or digital/whiteboard finishes.

**Strong and durable galvanised steel**

- Strong & Durable
- Whiteboard finish
- Magnetically receptive surface
- Specially developed digital coating
- 5 year guarantee*

*The product is suitable for interior and exterior use but any cut/exposed edges must be treated and protected in order to prevent oxidisation when exposed to weathering.
Both sides of the panel have a flat, smooth, uniform surface, one side with a digital coating to help produce vibrant, colour-fast prints and the other side with a whiteboard coating.

Ideal for hoardings, whiteboards, printing and many other applications, the galvanised steel provides additional strength plus the versatility of a magnetically receptive surface.

Multishield panels can be fabricated, are strong, self-supporting and offer outstanding reliability with the backing of a 5 year guarantee*.
